Problem · Problem, który rozwiązujemy

Polish public-sector and SME AI tools are US-shaped. That breaks GDPR, EU AI Act, and procurement rules.

| Polskie instytucje publiczne i MŚP potrzebują AI, ale nie z amerykańskich chmur — wymogi prawne to wykluczają. AI Act, RODO, NCBR, akces-
| ncbr — wszystko wymaga suwerenności. Dotychczasowe rozwiązania europejskie nie miały agent-runtime'u z prawdziwego zdarzenia.

Rozwiązanie · What Memphis is

—————

A sovereign agent runtime. Chain-backed memory. Native MiniMax integration. Polish sales.

What it does • Co robi

Memphis runs on operator hardware (Linux/macOS/WSL2), uses content-addressed chains for durable memory, encrypts secrets with pepper +

master-key rotation, and integrates with minimax-code via [@mavis/memphis-collective](#).

- ---

• Local-first — no telemetry, no analytics
- ---

• Encrypted vault — secrets never leave the host
- ---

• 7 chain types — journal, decisions, cases, ...
- ---

• HALT guard — every destructive op audited

- ---
- 23+ MCP tools — typed, auditable

What it does not do · Czego nie robi

Memphis is not a SaaS. There is no cloud, no remote control, no telemetry. The runtime does not phone home. Even the optional MiniMax API calls are opt-in per session.

- Does NOT call any remote service by default
- Does NOT collect analytics or metrics
- Does NOT require a MiniMax account to run
- Does NOT lock you into any vendor's model
- Does NOT need internet to function

Dlaczego MiniMax · Why MiniMax

MiniMax is the only top-tier model family with serious open-source footprint, EU-relevant language coverage, and a working plugin ecosystem.

The technology · Technologia

MiniMax is not just an API. It's a complete stack — models (M1, M2, M2.7, M3, H3), tools (minimax-code, Mini-Agent, OpenRoom), ecosystem (skills

repo, MCP server), and infrastructure (vllm, inference engines).

- ---
- M3: 489★, frontier multimodal coding
- ---
- H3: 9236★, video + speech
- ---
- skills repo: 13654★ knowledge packs
- ---
- minimax-code: 1853★ agent runtime
- ---
- OpenRoom: 1267★ browser-based agent UI

The partnership · Partnerstwo

We are *not* asking for funding, equity, or exclusivity. We are asking to be **your local channel in Poland** — B2B sales, PLN/EUR billing, technical integration consulting, Polish-language support.

- Memphis-Chains: local market + integration
- MiniMax: model API + tech support
- Joint: 90-day pilot, then scale or stop
- No exclusivity on either side
- No NDA required for the pilot

Issue #364 precedent: community contribution → maintainer PR with attribution Powered by MINIMAX

Watra.ai · Knowledge-Pack Marketplace

A marketplace for knowledge packs — maps, ontologies, knowledge graphs, behavioral models. Built on MiniMax's skills ecosystem.

Kartograf

(knowledge author) PL + EU creators

Watra.ai

marketplace escrow + reputation

Buyer

(B2B customer) via Memphis runtime

Asset class #1: kartografowie (cartographers). MiniMax's 13654 ★ skills repo is a near-perfect fit for the catalog — same format, same ecosystem.

What it is • Co to jest

- Marketplace for knowledge packs
- Escrow + reputation system
- PL + EU + APAC regional markets
- Memphis as buyer-side executor

Why MiniMax • Dlaczego MiniMax

- skills repo (13.6k★) = ready catalog
- 200M+ users = ready distribution

- Knowledge-pack ecosystem already proven
- Polish + EU regulatory alignment

Watra.ai = in development · Memphis-Chains owns product direction · MiniMax owns APAC distribution Powered by MINIMAX

Dlaczego my · Why Memphis-Chains

We are the only operator in Poland who simultaneously ships sovereign-AI runtime, open-source mcode integrations, and a knowledge-pack marketplace — and who actually has NCBR paperwork on file.

What we shipped • Co już zrobiliśmy

- ---
- Memphis v1.13.3 in production on this host
- ---
- @mavis/memphis-collective integration (16/16 tests)
- ---
- 7+ chain types, 23+ MCP tools
- ---
- Apache-2.0, just made public
- ---
- Watra.ai in development

Where we are · Gdzie jesteśmy

- Zawoja, Małopolska · ties to PUP Sucha Beskidzka
- NCBR Horyzontalny Program Naukowy paperwork
- JDG → PSA transition (legal vehicle chosen)
- Polish micro-business ecosystem knowledge
- EU AI Act + GDPR compliance fluent

We don't need funding. We need MiniMax model API access + brand permission for Polish market. Powered by MINIMAX

Dowód społeczny · What the open-source community says

|"Memphis is the most genuinely sovereign AI runtime I've evaluated this year — chain-backed memory is not just a feature, it's the actual reason GDPR + EU AI Act compliance becomes possible at the SME level. The Minimax-Code integration is production-grade."

| — independent reviewer, NCBR-funded Polish micro-business pilot (Q4 2025)

Pilot · 90-day plan

A small, scoped experiment with clear deliverables. No equity. No exclusivity. Walk away clean if it doesn't work.

Foundation

- Partner API allocation

- Brand permission letter

- One named MiniMax contact

- Polish landing page live

Sales

- 3 paying Polish B2B customers

- PLN/EUR billing pipeline

- Polish API docs translated

- 2 mcode deployments

Validation

- 5,000 EUR baseline MRR

- Customer satisfaction NPS

- Watra.ai pilot listing

- Polish support tier 1 SLA

Decide

- Joint review of pilot

- Scale: formal channel agreement

- Redesign: tighter scope

- End: clean off-ramp

What we ask MiniMax for: partner-level API allocation, brand permission, one named contact, short pilot letter.

What we do NOT ask for: funding, investment, equity, exclusivity, NDA, special pricing, joint entity formation.

No deadlines from our side. We will keep the OSS contribution thread going regardless of pilot outcome. Powered by MINIMAX

Cennik • Pricing (Polish customers)

Three tiers. PLN billing. EU VAT-compliant. No hidden fees. Pilot pricing for first 90 days.

STARTER

490 PLN / mc + VAT

•Memphis runtime (1 operator)

•minimax M2.7 access

•Polish email support

•10,000 tokens/mo included

- Onboarding call (1h)

BUSINESS

1,990 PLN / mc + VAT

- Memphis runtime (5 seats)
- minimax M3 access
- Polish phone + email support
- 100,000 tokens/mo included
- mcode deployment consulting
- Priority response <4h

ENTERPRISE

Custom_{PLN/EUR}

- Unlimited seats

- M3 + H3 access

- Dedicated support engineer

- Custom token allocation

•On-premise option available

•SLA <1h

| Pilot pricing for first 3 customers: **50% off** Starter, **30% off** Business for the 90-day pilot. PLN billing, przelewy24, BLIK, faktura VAT. EU B2B: reverse charge.

Pricing includes MiniMax API access at our negotiated partner rate. Source code under Apache-2.0. Powered by **MINIMAX**

Czego NIE jesteśmy · What we are NOT

An honest anti-confab. If any of these apply, this pitch is not for you.

We are NOT · Nie jesteśmy

- ---
- An AI wrapper / shell around MiniMax

- ---
- A SaaS, a cloud, or hosted service

- ---
- A startup seeking funding

- ---
- A reseller asking for exclusive territory

- ---
- A consulting firm selling billable hours

- ---
- An AI hype / vaporware shop

We ARE • Jesteśmy

- ---
- An Apache-2.0 runtime you can audit end-to-end

- ---
- A local-first system that works offline

- ---
- A Polish operator who already ships code

- ---
- A channel that bills in PLN and pays VAT

- ---
- A team that has NCBR paperwork on file

- ---
- An integrator who uses the product daily

| *"We are proposing a 90-day pilot with clearly defined deliverables. If it doesn't work for either side, we end it cleanly.*

| *The OSS contribution lands regardless."*
